

Reinvent The Wheel Process.

A CAST SAVINGS OF \$884,648.00

Compare CEC's revolutionary CleanCast® process with less efficient conventional wheel casting processes. To see a detailed cost comparison, visit our website at cec-intl.com/CleanCast.

The wheels have been turning at CEC. Our latest innovation is *CleanCast*®, a new heat-treating process that uses high-pressure heated air to rapidly heat wheel castings.

CleanCast® helps you process faster – a lot faster. And what's more, no racks or trays or baskets are required – none. *CleanCast*® is a leaner, more cost-efficient production process. It's another breakthrough from the innovators at CEC.

CEC

CONSOLIDATED ENGINEERING COMPANY

Innovative to the Core.
